Section I: Organization-Specific Information

1.1 Organization Details

Field	Detail
Organization Name	ByteStreams LLC (d/b/a DialTone.Med)
Physical Address	100 Powell Place #1473, Nashville, TN 37204
Mailing Address	100 Powell Place #1473, Nashville, TN 37204
Main Phone	(629) 250-1143
Fax	N/A
Email	scotton@bytestreams.ai

1.2 Compliance Officer

Field	Detail
Name	Steven Cotton
Title	Owner
Phone	(629) 250-1143
Email	scotton@bytestreams.ai

1.3 HIPAA Compliance Team

As a sole-person LLC, Steven Cotton serves as the sole HIPAA Compliance Officer and is responsible for all compliance-related activities. As the

organization grows, additional team members will be designated and this section will be updated accordingly.

1.4 Technical Infrastructure

DialTone.Med is a cloud-based AI-powered phone assistant platform designed for medical and dental practices. The system handles inbound phone calls, appointment scheduling, patient intake, and message routing. Technical infrastructure includes:

- Cloud-hosted AI/ML speech recognition and natural language processing engines
- VoIP/SIP telephony infrastructure
- AES-256 encrypted databases for call data and any PHI processed
- TLS 1.2+ encrypted data transmission for all communications
- API integrations with practice management and EHR systems
- Role-based access controls and multi-factor authentication
- Automated audit logging across all system components

1.5 Business Associates

ByteStreams LLC operates as a Business Associate to Covered Entity healthcare practices that deploy DialTone.Med. ByteStreams LLC will execute Business Associate Agreements (BAAs) with all client healthcare practices prior to processing any PHI. Additionally, ByteStreams LLC will maintain BAAs with its own subcontractors and vendors that may access or process PHI, including but not limited to cloud infrastructure providers, telephony service providers, and any third-party integrations.

1.6 Employee Training

Training Schedule: As a sole-person LLC, the Owner completes annual HIPAA compliance self-training and certification. As staff are onboarded, all

new workforce members will complete HIPAA training within 30 days of hire, with annual refresher training thereafter.

Documentation Process: All training completion is documented with date, training content covered, and attestation of understanding. Training records are retained for a minimum of six (6) years.

1.7 Review and Audit Procedures

Internal Review Schedule: This policy and all associated procedures are reviewed annually, or more frequently as necessitated by changes in regulations, business operations, or following a security incident.

Audit Mechanisms: System access logs, PHI access records, and security event logs are reviewed quarterly. Automated monitoring tools generate alerts for anomalous access patterns. A comprehensive risk assessment is conducted annually.

Section II: Policy Statement

2.1 Purpose

This policy establishes the guidelines for ensuring compliance with the Health Insurance Portability and Accountability Act of 1996 (HIPAA), as amended by the Health Information Technology for Economic and Clinical Health (HITECH) Act, to protect the privacy and security of Protected Health Information (PHI) processed by ByteStreams LLC through its DialTone.Med platform.

ByteStreams LLC is committed to maintaining the highest standards of privacy and security with respect to all PHI that it creates, receives, maintains, or transmits on behalf of its Covered Entity clients. This policy reflects that commitment and provides a comprehensive framework for

achieving and sustaining compliance with all applicable federal and state regulations governing the protection of health information.

2.2 Scope

This policy applies to all workforce members, contractors, subcontractors, and business associates engaged with the handling, receiving, maintaining, processing, or transmitting of PHI within or through ByteStreams LLC and the DialTone.Med platform. This includes all forms of PHI:

- **Verbal PHI:** Information communicated during phone calls handled by the DialTone.Med platform
- **Electronic PHI (ePHI):** Data stored in databases, transmitted via APIs, contained in call recordings, transcriptions, and system logs
- **Derivative Data:** Any data derived from PHI through processing, analysis, or aggregation that retains individually identifiable characteristics

This policy encompasses all systems, networks, applications, and processes that create, receive, store, transmit, or otherwise interact with PHI in any form.

Section III: Definitions

The following terms, as used throughout this policy, are defined as follows:

3.1 Protected Health Information (PHI)

Individually identifiable health information transmitted or maintained in any form or medium by a covered entity or its business associates. PHI includes information that relates to the past, present, or future physical or mental health condition of an individual; the provision of health care to an individual; or the past, present, or future payment for the provision of

health care to an individual — and that identifies the individual or for which there is a reasonable basis to believe the information can be used to identify the individual. In the context of DialTone.Med, this includes patient names, phone numbers, appointment details, dates of birth, insurance information, reasons for visit, and any other individually identifiable health data captured during phone interactions.

3.2 Electronic Protected Health Information (ePHI)

PHI that is created, stored, transmitted, or received electronically. For DialTone.Med, this encompasses call recordings, transcriptions, appointment data stored in databases, API transmissions to EHR/PMS systems, and any cached or logged data containing patient identifiers.

3.3 Covered Entity

A health plan, health care clearinghouse, or health care provider who transmits any health information in electronic form in connection with a transaction covered by HIPAA. DialTone.Med's client healthcare practices — including medical offices, dental practices, and other healthcare providers — are Covered Entities.

3.4 Business Associate

A person or entity that performs certain functions or activities on behalf of, or provides certain services to, a Covered Entity that involve the use or disclosure of PHI. ByteStreams LLC operates as a Business Associate to its client healthcare practices. Business Associate functions include claims processing, data analysis, utilization review, billing, benefit management, practice management, and repricing, as well as legal, actuarial, accounting, consulting, data aggregation, management, administrative, accreditation, and financial services.

3.5 Minimum Necessary Standard

The principle that, to the extent practical, only the minimum amount of PHI necessary to accomplish the intended purpose of a use, disclosure, or request should be used or disclosed. This standard requires ByteStreams LLC to evaluate its practices and implement policies and procedures to reasonably limit uses and disclosures to the minimum necessary to achieve the purpose of the use or disclosure.

3.6 Workforce Member

Any employee, volunteer, trainee, contractor, or other person whose conduct, in the performance of work for ByteStreams LLC, is under its direct control, whether or not they are paid by ByteStreams LLC.

3.7 Security Incident

The attempted or successful unauthorized access, use, disclosure, modification, or destruction of information or interference with system operations in an information system. Security incidents include, but are not limited to, unauthorized access to ePHI, malware infections, denial-of-service attacks, unauthorized system configuration changes, and the loss or theft of devices containing ePHI.

3.8 Breach

The acquisition, access, use, or disclosure of PHI in a manner not permitted under the HIPAA Privacy Rule which compromises the security or privacy of the PHI. A breach is presumed to have occurred unless ByteStreams LLC demonstrates that there is a low probability that the PHI has been compromised, based on a risk assessment considering: (1) the nature and extent of the PHI involved, (2) the unauthorized person who used the PHI or to whom the disclosure was made, (3) whether the PHI was actually acquired or viewed, and (4) the extent to which the risk to the PHI has been mitigated.

Section IV: Roles and Responsibilities

4.1 HIPAA Compliance Officer — Steven Cotton, Owner

The HIPAA Compliance Officer is responsible for the overall management and oversight of the HIPAA compliance program. Specific responsibilities include:

- Oversee and enforce compliance with all HIPAA regulations, including the Privacy Rule, Security Rule, Breach Notification Rule, and Enforcement Rule
- Develop, implement, and maintain HIPAA policies and procedures
- Conduct and document risk assessments and audits
- Manage breach identification, investigation, response, and notification processes
- Ensure all workforce members receive appropriate HIPAA training
- Serve as the primary point of contact for HIPAA-related inquiries, complaints, and regulatory matters
- Review and approve Business Associate Agreements
- Monitor changes to HIPAA regulations and update policies accordingly
- Maintain documentation of all compliance activities
- Coordinate with legal counsel on HIPAA-related matters as needed

4.2 IT / Technical Operations — Currently Managed by Steven Cotton, Owner

The IT/Technical Operations function is responsible for implementing and maintaining the technical infrastructure that supports HIPAA compliance. Specific responsibilities include:

- Implement and maintain technical safeguards for ePHI, including encryption, access controls, and audit logging
- Manage access controls, encryption, and authentication systems
- Monitor system access logs and security alerts
- Ensure secure configuration of all systems handling PHI
- Manage vulnerability assessments and penetration testing
- Oversee backup, disaster recovery, and business continuity systems
- Respond to and document security incidents
- Maintain current patching and updates on all systems
- Ensure secure software development lifecycle practices for the DialTone.Med platform

4.3 All Workforce Members and Contractors

As the organization grows, all workforce members and contractors will be required to:

- Comply with all HIPAA policies and procedures
- Complete required HIPAA training within designated timeframes
- Report any suspected or known security incidents or breaches immediately to the Compliance Officer
- Access only the minimum necessary PHI required for job functions
- Protect login credentials and access tokens; never share authentication credentials

- Follow proper procedures for the use and disclosure of PHI
- Secure workstations and devices when unattended
- Cooperate with audits, investigations, and compliance reviews

---

Section V: Privacy Procedures

5.1 Minimum Necessary Standard

ByteStreams LLC applies the minimum necessary standard to all uses and disclosures of PHI. The DialTone.Med platform is designed to collect, process, and transmit only the PHI necessary to fulfill the specific function requested by the Covered Entity client. For example, appointment scheduling requires patient name, contact number, preferred date/time, and reason for visit — not full medical history.

Access to PHI within the organization is limited based on role and job function. Each workforce member's access is restricted to the categories of PHI reasonably necessary to perform the duties of their position. Access levels are reviewed quarterly and adjusted as roles change.

5.2 Authorization

Uses and disclosures of PHI not otherwise permitted by the Privacy Rule require a valid written authorization from the individual. A valid authorization must contain the following elements:

- A description of the PHI to be used or disclosed
- The person(s) authorized to make the use or disclosure
- The person(s) to whom the disclosure may be made
- An expiration date or event
- The purpose of the use or disclosure

- The individual's signature and date
- A statement of the individual's right to revoke the authorization

ByteStreams LLC does not use or disclose PHI for marketing, sale of PHI, or any purpose beyond the scope of its Business Associate Agreements without explicit patient authorization.

5.3 Patient Rights

ByteStreams LLC supports Covered Entity clients in honoring the following patient rights under the HIPAA Privacy Rule:

5.3.1 Right of Access

Individuals have the right to access their PHI maintained by a Covered Entity. Requests received through DialTone.Med are promptly routed to the appropriate Covered Entity client for fulfillment per their policies and procedures.

5.3.2 Right to Amendment

Individuals may request amendments to their PHI. Such requests received via DialTone.Med are forwarded to the Covered Entity client for review and determination.

5.3.3 Right to Restriction

Individuals may request restrictions on certain uses or disclosures of their PHI. DialTone.Med supports Covered Entity clients in honoring such restrictions as directed and configured within the platform.

5.3.4 Right to Confidential Communications

Individuals may request that communications be made by alternative means or at alternative locations. DialTone.Med accommodates such requests as configured by the Covered Entity client, including directing communications to specified phone numbers or contact methods.

5.3.5 Right to an Accounting of Disclosures

Individuals have the right to receive an accounting of certain disclosures of their PHI. ByteStreams LLC maintains records of disclosures as required and provides this information to Covered Entity clients upon request to support their fulfillment of this right.

5.3.6 Right to File Complaints

Individuals may file complaints regarding privacy practices. Complaints received through DialTone.Med are escalated to the Covered Entity client and, if directed at ByteStreams LLC, to the Compliance Officer. Individuals may also file complaints directly with the Secretary of the U.S. Department of Health and Human Services. No individual will be retaliated against for filing a complaint.

Section VI: Security Procedures

6.1 Administrative Safeguards

6.1.1 Risk Analysis

ByteStreams LLC conducts a thorough risk analysis of all systems and processes involving ePHI at least annually, or whenever significant changes occur to the platform, infrastructure, or operations. The risk analysis identifies potential threats and vulnerabilities, assesses their likelihood and impact, and documents mitigation strategies. Risk analysis results are reviewed by the Compliance Officer and form the basis for the organization's risk management plan.

6.1.2 Workforce Security

Access to ePHI is granted based on job function and the minimum necessary standard. Background checks are performed on all workforce members with access to ePHI. Access is promptly terminated upon end of employment or

contract, including revocation of all credentials, access tokens, and system permissions within twenty-four (24) hours of separation.

6.1.3 Information Access Management

Role-based access controls govern all access to ePHI. Access privileges are reviewed quarterly and adjusted as needed. All access requests are documented and approved by the Compliance Officer. Access rights follow the principle of least privilege, granting only the permissions necessary to perform assigned duties.

6.1.4 Security Awareness and Training

All workforce members complete HIPAA security awareness training upon onboarding and annually thereafter. Training covers password management, phishing awareness, social engineering, device security, incident reporting, and proper handling of PHI. Training effectiveness is evaluated, and additional training is provided as needed.

6.1.5 Security Incident Procedures

ByteStreams LLC maintains documented procedures for identifying, reporting, investigating, and mitigating security incidents. All incidents are logged with date/time, description, individuals involved, systems affected, and corrective actions taken. Incident response procedures include:

- Immediate containment and assessment of the incident
- Notification of the Compliance Officer
- Investigation to determine scope, cause, and impact
- Remediation of vulnerabilities exploited
- Documentation of all findings and actions taken
- Post-incident review and lessons learned

6.1.6 Contingency Plan

ByteStreams LLC maintains a comprehensive contingency plan that includes the following components:

- **Data Backup Procedures:** Daily encrypted backups with geographic redundancy across multiple availability zones
- **Disaster Recovery Procedures:** Defined Recovery Time Objective (RTO) and Recovery Point Objective (RPO) targets to minimize data loss and downtime
- **Emergency Mode Operations:** Procedures for critical system access during emergencies, ensuring continued protection of ePHI
- **Testing and Revision:** Contingency plan tested annually and updated as needed based on test results and changes to infrastructure
- **Applications and Data Criticality Analysis:** Identification and prioritization of systems and data critical to business operations and ePHI protection

6.1.7 Evaluation

Security measures are evaluated at least annually through internal reviews and, when appropriate, third-party assessments. Evaluation results are documented and used to inform updates to security policies, procedures, and technical controls.

6.2 Physical Safeguards

6.2.1 Facility Access Controls

Physical access to any facilities housing systems that store or process ePHI is restricted to authorized personnel. As a cloud-based platform, DialTone.Med relies on cloud service providers' SOC 2 Type II certified data centers with physical security controls including biometric access, 24/7

surveillance, and environmental controls (fire suppression, climate control, redundant power).

6.2.2 Workstation Use

Policies govern the proper use of workstations that access ePHI, including:

- Automatic screen lock after a defined period of inactivity
- Full-disk encryption required on all workstations
- Prohibited use of public or unsecured networks for accessing ePHI
- Use of VPN connections when accessing systems remotely
- Prohibition on storing ePHI on local workstation drives

6.2.3 Workstation Security

All workstations accessing ePHI are encrypted (full-disk encryption), protected with endpoint security software (anti-malware, host-based intrusion detection), and configured with automatic updates to ensure current security patches are applied.

6.2.4 Device and Media Controls

Policies govern the receipt and removal of hardware and electronic media containing ePHI, including:

- **Disposal:** Secure disposal procedures including data wiping (DoD 5220.22-M standard or equivalent), degaussing, or physical destruction
- **Media Re-use:** All ePHI is removed from media before re-use through certified sanitization processes
- **Accountability:** Documentation of all media movements, including receipt, transfer, and disposal, with responsible party identified
- **Data Backup and Storage:** Encrypted backups stored in geographically redundant, access-controlled environments

6.3 Technical Safeguards

6.3.1 Access Control

- **Unique User Identification:** A unique user ID is assigned to each workforce member for tracking and accountability
- **Emergency Access Procedures:** Documented procedures for obtaining access to ePHI during emergencies
- **Automatic Logoff:** Systems automatically terminate sessions after defined periods of inactivity
- **Encryption and Decryption:** ePHI is encrypted at rest using AES-256 encryption and in transit using TLS 1.2 or higher

6.3.2 Audit Controls

Comprehensive audit logging captures all access to systems containing ePHI, including user identity, timestamp, action performed, and data accessed. Audit logs are:

- Protected from unauthorized modification or deletion
- Retained for a minimum of six (6) years
- Reviewed quarterly by the Compliance Officer
- Monitored by automated tools for anomalous access patterns

6.3.3 Integrity Controls

Mechanisms are in place to authenticate ePHI and protect it from improper alteration or destruction, including checksums, version control, database integrity monitoring, and automated alerts for unauthorized data modifications.

6.3.4 Person or Entity Authentication

Multi-factor authentication (MFA) is required for all access to systems containing ePHI. API authentication uses industry-standard protocols,

including OAuth 2.0 and API keys with regular rotation policies. All authentication events are logged and monitored.

6.3.5 Transmission Security

All ePHI transmitted over electronic communications networks is protected as follows:

- Encryption using TLS 1.2 or higher for all data in transit
- VPN connections required for administrative access to production systems
- API communications with client EHR/PMS systems use encrypted channels with mutual TLS (mTLS) where supported
- VoIP/SIP telephony traffic encrypted using SRTP (Secure Real-time Transport Protocol)
- Prohibition on transmitting ePHI via unencrypted email or messaging services

---

Section VII: Training and Awareness

7.1 Initial Training

All new workforce members must complete comprehensive HIPAA training within thirty (30) days of their start date, prior to being granted access to any systems containing PHI. Initial training covers all aspects of this policy, the HIPAA Privacy Rule, the HIPAA Security Rule, and organization-specific procedures relevant to the individual's role.

7.2 Ongoing Training

Annual refresher training is required for all workforce members. Additional training is provided when any of the following occur:

- Significant changes to HIPAA regulations or guidance
- Material updates to organizational policies or procedures
- Significant changes to the DialTone.Med platform architecture or systems
- Following a security incident or breach
- When a workforce member's role changes in a way that affects their interaction with PHI

7.3 Documentation

Training completion records include the following elements and are maintained for each training event:

- Trainee name and role
- Date of training
- Topics covered and training materials used
- Trainer or training source (e.g., online platform, instructor name)
- Signed attestation of understanding

All training records are retained for a minimum of six (6) years from the date of creation.

7.4 Topics Covered

HIPAA training encompasses the following topics, at minimum:

- HIPAA Privacy Rule requirements and patient rights
- HIPAA Security Rule requirements and safeguards (administrative, physical, and technical)

- Proper handling, use, and disclosure of PHI/ePHI
- The minimum necessary standard and its application
- Password management and authentication best practices
- Phishing, social engineering, and cybersecurity awareness
- Security incident and breach identification and reporting procedures
- Sanctions for non-compliance
- Organization-specific policies and procedures relevant to DialTone.Med operations
- Business Associate obligations and responsibilities
- Patient rights and how to handle patient requests

Section VIII: Breach Notification

8.1 Identification and Reporting

All workforce members must report any suspected or confirmed breach of PHI to the Compliance Officer immediately, and no later than twenty-four (24) hours after discovery. Upon receiving a report, the Compliance Officer conducts a prompt investigation to determine whether a breach has occurred.

The investigation includes applying the four-factor risk assessment as required by 45 CFR § 164.402:

1. **Nature and Extent:** The nature and extent of the PHI involved, including the types of identifiers and the likelihood of re-identification
2. **Unauthorized Person:** The unauthorized person who used the PHI or to whom the disclosure was made

3. **Acquisition or Viewing:** Whether the PHI was actually acquired or viewed
4. **Mitigation:** The extent to which the risk to the PHI has been mitigated

A breach is presumed to have occurred unless the risk assessment demonstrates a low probability that the PHI has been compromised.

8.2 Notification Requirements

8.2.1 Individual Notification

If a breach is confirmed, affected individuals are notified without unreasonable delay and no later than sixty (60) days after discovery. Notifications are sent via first-class mail to the individual's last known address or by email if the individual has agreed to electronic notice. If contact information is insufficient or outdated, substitute notice is provided as required by regulation. The notification includes: a description of the breach, the types of PHI involved, steps individuals should take to protect themselves, what ByteStreams LLC is doing to investigate and mitigate the breach, and contact information for further inquiries.

8.2.2 HHS Notification

Breaches affecting 500 or more individuals are reported to the Secretary of Health and Human Services without unreasonable delay and no later than sixty (60) days after discovery via the HHS breach reporting portal. Breaches affecting fewer than 500 individuals are logged in an internal breach register and reported to HHS annually, within sixty (60) days of the end of the calendar year in which the breach was discovered.

8.2.3 Media Notification

If a breach affects 500 or more residents of a single state or jurisdiction, prominent media outlets serving that state or jurisdiction are notified

without unreasonable delay and no later than sixty (60) days after discovery of the breach.

8.2.4 Covered Entity Notification

As a Business Associate, ByteStreams LLC notifies affected Covered Entity clients of any breach without unreasonable delay and no later than thirty (30) days after discovery. The notification provides sufficient information for the Covered Entity to fulfill its own notification obligations, including the identification of each individual whose PHI has been, or is reasonably believed to have been, accessed, acquired, used, or disclosed during the breach.

8.3 Documentation

All breach investigations, risk assessments, notifications, and corrective actions are documented in detail and retained for a minimum of six (6) years. Documentation includes:

- Date and time of breach discovery
- Description of the breach and PHI involved
- Risk assessment results and determination
- Individuals affected
- Notifications sent (dates, recipients, content)
- Corrective actions taken
- Post-incident review findings

8.4 Mitigation Measures

Upon confirmation of a breach, ByteStreams LLC takes immediate steps to mitigate any harmful effects, including:

- Securing the PHI and containing the breach

- Remediating the vulnerability or condition that allowed the breach to occur
- Cooperating with affected individuals and Covered Entity clients
- Providing appropriate remediation services to affected individuals (e.g., credit monitoring, identity theft protection) when warranted by the nature and scope of the breach
- Implementing additional safeguards to prevent recurrence

Section IX: Sanctions

9.1 Non-Compliance Consequences

Workforce members who violate HIPAA regulations or this policy are subject to disciplinary action, up to and including termination of employment or contract. Sanctions are applied consistently and are commensurate with the severity of the violation. All sanctions are documented, including the nature of the violation, the individual involved, the sanction imposed, and the date.

The following factors are considered in determining appropriate sanctions:

- The severity of the violation and the sensitivity of the PHI involved
- Whether the violation was intentional or unintentional
- Whether the individual had received appropriate training
- The individual's history of prior violations
- The extent of harm resulting from the violation

Sanctions may include, but are not limited to:

- Verbal or written warning
- Mandatory additional training

- Suspension of access to systems containing PHI
- Suspension of employment or contract
- Termination of employment or contract
- Referral for criminal prosecution in cases of willful or egregious violations

9.2 Reporting Violations

Workforce members are encouraged and required to report suspected violations of this policy without fear of retaliation. Reports may be made directly to the Compliance Officer:

- **Phone:** (629) 250-1143
- **Email:** scotton@bytestreams.ai

ByteStreams LLC maintains a strict non-retaliation policy to protect individuals who report violations in good faith. No workforce member will be subjected to intimidation, threats, coercion, discrimination, or any other retaliatory action for reporting a suspected or confirmed violation of HIPAA regulations or this policy. Any retaliatory action taken against a reporting individual will itself be treated as a violation subject to sanctions.

Section X: Documentation and Retention

10.1 Policy Documentation

This policy and all associated procedures, forms, and communications are maintained in written (electronic) form and made available to all workforce members. The Compliance Officer is responsible for ensuring that all documentation is current, accurate, and accessible.

10.2 Record Retention

All HIPAA-related documentation is retained for a minimum of six (6) years from the date of creation or the date when the document was last in effect, whichever is later. This retention requirement applies to the following categories of documentation:

Document Type	Retention Period
HIPAA Policies and Procedures	Six (6) years from date last in effect
Risk Assessments	Six (6) years from date of creation
Training Records	Six (6) years from date of creation
Audit Logs	Six (6) years from date of creation
Business Associate Agreements	Six (6) years from date last in effect
Breach Notifications and Investigation Records	Six (6) years from date of creation
Sanction Records	Six (6) years from date of creation
Incident Reports	Six (6) years from date of creation
Authorizations and Consent Forms	Six (6) years from date last in effect
Complaints and Resolutions	Six (6) years from date of creation

10.3 Access to Documentation

Current versions of all HIPAA policies and procedures are accessible to all workforce members through the organization's internal documentation system. Historical versions are archived and available upon request to the Compliance Officer. All documentation is maintained in a secure, access-controlled environment with appropriate backup procedures.

Section XI: Assumptions

This policy operates under the following assumptions:

5. ByteStreams LLC is committed to full compliance with all applicable provisions of HIPAA, the HITECH Act, and associated regulations, including the Omnibus Rule.
6. All workforce members will act in good faith and in the best interest of protecting PHI.
7. ByteStreams LLC will comply with all applicable federal and state privacy and security laws, including any state laws that are more stringent than HIPAA.
8. Confidentiality of PHI is a core operational principle and is integral to all business functions of ByteStreams LLC and the DialTone.Med platform.
9. This policy and all related procedures will be accessible to all workforce members at all times.
10. Training and education are essential components of maintaining compliance and will be provided on an ongoing basis.
11. Risk management is an ongoing process requiring continuous assessment and improvement.
12. Incident response procedures will be activated promptly and effectively when needed.
13. All Business Associates and subcontractors will be required to enter into Business Associate Agreements and comply with applicable HIPAA requirements.
14. ByteStreams LLC is committed to continuous improvement of its privacy and security posture through regular evaluation and enhancement of policies, procedures, and technical controls.

15. Complete and accurate documentation of all compliance activities is maintained as a fundamental operational requirement.
16. No workforce member will face retaliation for reporting compliance concerns in good faith.

Section XII: Acknowledgment

I acknowledge that I have received, read, and understand the ByteStreams LLC HIPAA Compliance Policy. I agree to comply with all policies and procedures outlined herein. I understand that violations of this policy may result in disciplinary action, up to and including termination, and may also result in civil and/or criminal penalties under applicable law.
